HOUSTON and LONDON, November 5, 2008 – Leading Windows Security resource site, WindowSecurity.com, announced today that **WinINSTALL** was selected the winner in the **Patch Management** category of the WindowSecurity.com Readers' Choice Awards.

"We are honored to be recognized by WindowSecurity.com readers as the winner for Patch Management," said Mark Cresswell, President and CEO at Scalable. "This recognition is a clear indication that the Microsoft IT community continues to rely upon the advanced capabilities of WinINSTALL to maximize their IT investments and ensure the availability of business-critical assets."

"Our Readers' Choice Awards give visitors to our site the opportunity to vote for the products they view as the very best in their respective category," said Sean Buttigieg, WindowSecurity.com manager. "WindowSecurity.com users are specialists in their field who encounter various network security solutions at the workplace. The award serves as a mark of excellence, providing the ultimate recognition from peers within the industry."

*WindowSecurity.com* conducts monthly polls to discover which product is preferred by Network Security administrators in a particular category of third party network security solutions. The awards draw a huge response per category and are based entirely on the visitors' votes.

WindowSecurity.com visitors can submit their votes for the current Readers' Award poll in the site's left-hand bar.

**About WinINSTALL**

**Scalable WinINSTALL™** product family provides innovative PC lifecycle management solutions, enabling medium to large organizations to automatically deploy, update and manage software and security for desktops, servers and notebook computers. The tightly integrated WinINSTALL suite allows IT administrators to define process workflows that dynamically manage PCs and other devices

from purchase to retirement. This intelligent architecture dramatically reduces operational costs and increases productivity for these valuable IT assets
